

Al¹³ Home Aluminum Railing Warranty

Fortress Railing Products warrants its Fortress Al¹³ Home Aluminum Railing products and accessories to be free from manufacturing defects in materials and workmanship to the original consumer purchaser for a limited lifetime period. Corrosion is termed extensive when there are multiple rust-through perforation instances on the same piece of product. This warranty does not cover damages caused by abnormal or improper use, improper product application, accident, alteration, welding, neglect, abuse, vandalism, lawn care equipment damage, abrasion, harsh chemicals, pool chemicals or chemicals for ice removal, air pollutants, improper service of installation or lack of service, building settlement, or damage caused by flood, fire or acts of God. Surface corrosion from scratches, nicks, and dents are not covered. For product located within 1 mile or less from the coast line, this Limited Warranty is for a period of 3 years from the date of purchase. Al¹³ Home Aluminum Railing products that have had direct contact with salt water are excluded from this warranty.

Care and Maintenance of Fortress Railing Products Powder-Coated Products and Surfaces:

- Immediately after installation of your Fortress Railing Products, clean powder-coated products and surfaces with a solution of warm water and non-abrasive, pH neutral detergent solution. Surfaces should be thoroughly rinsed after cleaning to remove all residues. All surfaces should be cleaned using a soft cloth or sponge.
- Ensure construction materials such as concrete, plaster, and paint splashes are removed immediately before they have a chance to dry. Failure to remove these materials may cause damage to the powder-coated surfaces.
- The frequency of cleaning depends in part on the standard of appearance and also the requirements to remove deposits that may cause damage to the powder film coating after prolonged exposure. Fortress recommends cleaning in three to four monthly intervals all products and powder-coated surfaces. In areas where higher traffic, increased atmospheric substances, or other effects may occur, the time period between cleanings should be increased to monthly intervals.
- **WARNING:** Do not use strong solvents such as thinners, or solutions containing chlorinated hydrocarbons, esters, or ketones. Abrasive cleaners or cutting compounds should not be used.
