## THE WORLD NEEDS REBELS

Built on the strength of more than 50 years of innovation, Fortress Building Products is one of the strongest brands in the residential, multi-family and commercial building products industry. Our capped composite materials have gone toe-to-toe with every climate imaginable and never been defeated. Now we are taking our trusted reputation to the next level with Fortress® cladding. Stand out with bold, beautiful, built-to-last solutions from Fortress Building Products.

## LEADING GLOBAL CHANGE IN THE WAY PEOPLE BUILD & LIVE

At Fortress Building Products, we strive to be designers of change — not just in the industry, but also in the lives of those around us. That starts by taking care of our world. From the reused, recycled and renewable raw ingredients like bamboo we use to create our products, to the solar power we harness to manufacture it (and the countless trees we protect from felling), we are proud to offer you holistically sustainable cladding.

### MADE WITH SOLAR ENERGY

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy. Our products are now manufactured using solar power to the fullest extent nature and weather support. We are fully committed to bringing you a product that's truly environmentally conscious.

### ECO-FRIENDLY COMPOSITION & PRODUCTION

In our factory nothing is wasted. This means that every bit of leftover material is put back into the manufacturing line to be recycled and made into something new and sustainable. The process is pollution free, and no greenhouse gases are emitted. Plus, not a single tree is cut down for the purpose of producing Fortress® cladding boards.

## LEADING GLOBAL CHANGE IN THE WAY PEOPLE BUILD & LIVE

### MADE WITH RECYCLED PLASTIC

Single-use plastics are choking our oceans. Once in the water, plastic never fully biodegrades. Fortress® composite cladding products are made up of 60% bamboo fibers and 40% recycled plastics, which would otherwise end up in landfills. Last year our composite products repurposed the equivalent of 500 million plastic bottles.

### NO HARSH CHEMICALS

Fortress cladding is free of toxic chemicals and preservatives normally used for the treatment of natural timber. Plus, our award-winning products are designed to last for years to come without the need for stains, sealants or other environmentally harmful chemicals.

### MADE WITH FSC BAMBOO

Bamboo is strong, safe and sustainable. This fast-growing grass has a greater tensile strength than steel, and can withstand compression better than concrete. It grows extremely quickly – without the need for pesticides or chemical fertilizers. Bamboo keeps our soil stronger, our air cleaner and our environment healthier.

## WALLS ARE MEANT TO BE CONQUERED.

Fortress® cladding gives your rainscreen assembly the warm aesthetic of wood, enhanced with the enduring performance of composite. Our eco-friendly cladding is UV, fade & weather resistant with rich colors that stay vibrant through the life of the product. In fact, our outstanding warranty covers performance, stains, and fading. Fortress cladding installs easily with standard tools, methods, and labor. It's ready to go with short lead times and global availability.

## OFF THE WALL IDEAS

Want more design flexibility for your facade? Fortress cladding inspires creativity by giving you the freedom to mix & match colors, profiles, orientations, and product lines. Dream it up, then hang it up.

## UNDERSTANDING RAINSCREEN TECHNOLOGY

Protect the integrity of your design by selecting materials that will withstand the elements. Fortress® cladding products for rainscreen applications help to manage moisture, support ventilation, and look amazing. Look behind the curtain to learn more about the science behind rainscreen technology.

## ON-THE-WALL DECKING. OFF-THE-WALL AESTHETICS.

Our cladding family is comprised of our Infinity® composite square boards and Apex® PVC square and grooved boards, which have been approved for use as cladding for rainscreen application. Using our deck boards within a facade means you can count on the superior wood emulation, long-term aesthetic performance and strong warranties that you've come to expect from us.

TO REACH THE PEAK,  
NEVER STOP CLIMBING

Looking for a spectacular new view? Clad your next project with Apex<sup>®</sup> capped bamboo-PVC (CBPVC) cladding boards from Fortress Building Products. Our revolutionary rainscreen boards provide the look of wood with the longevity of PVC composite. The vibrant, enduring dual-tone color palette gives you plenty of design options that will look great for years to come. It resists scratches and moisture. Put it up quickly and take care of it easily.

Vibrant Dual-Tone Colors

Fast, Low Cost Installation

Easy, Inexpensive Maintenance

#### APEX® BOARDS KEY FEATURES

- Eco-friendly composition & production
- Scratch & moisture resistance
- Made with solar energy
- Made with recycled plastic
- Made with FSC bamboo (a fast-growing grass)
- Requires simple maintenance with no harsh chemicals
- Requires no reapplication of toxic chemicals
- Installs easily with standard tools, methods & labor
- Face-fasteners or concealed fastening
- Warranty covers performance, stain & fade

## APEX® BOARD PROFILE

### GROOVED BOARD SPECS

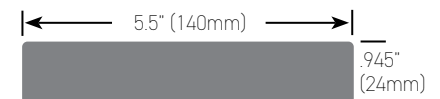

Specs: 5.5" x .945" x 12'/16'/20'  
(140mm x 24mm x 366cm/488cm/610cm)

Grooved boards can be installed with Hulk Face or Hulk Hidden fasteners.

### SQUARE BOARD SPECS

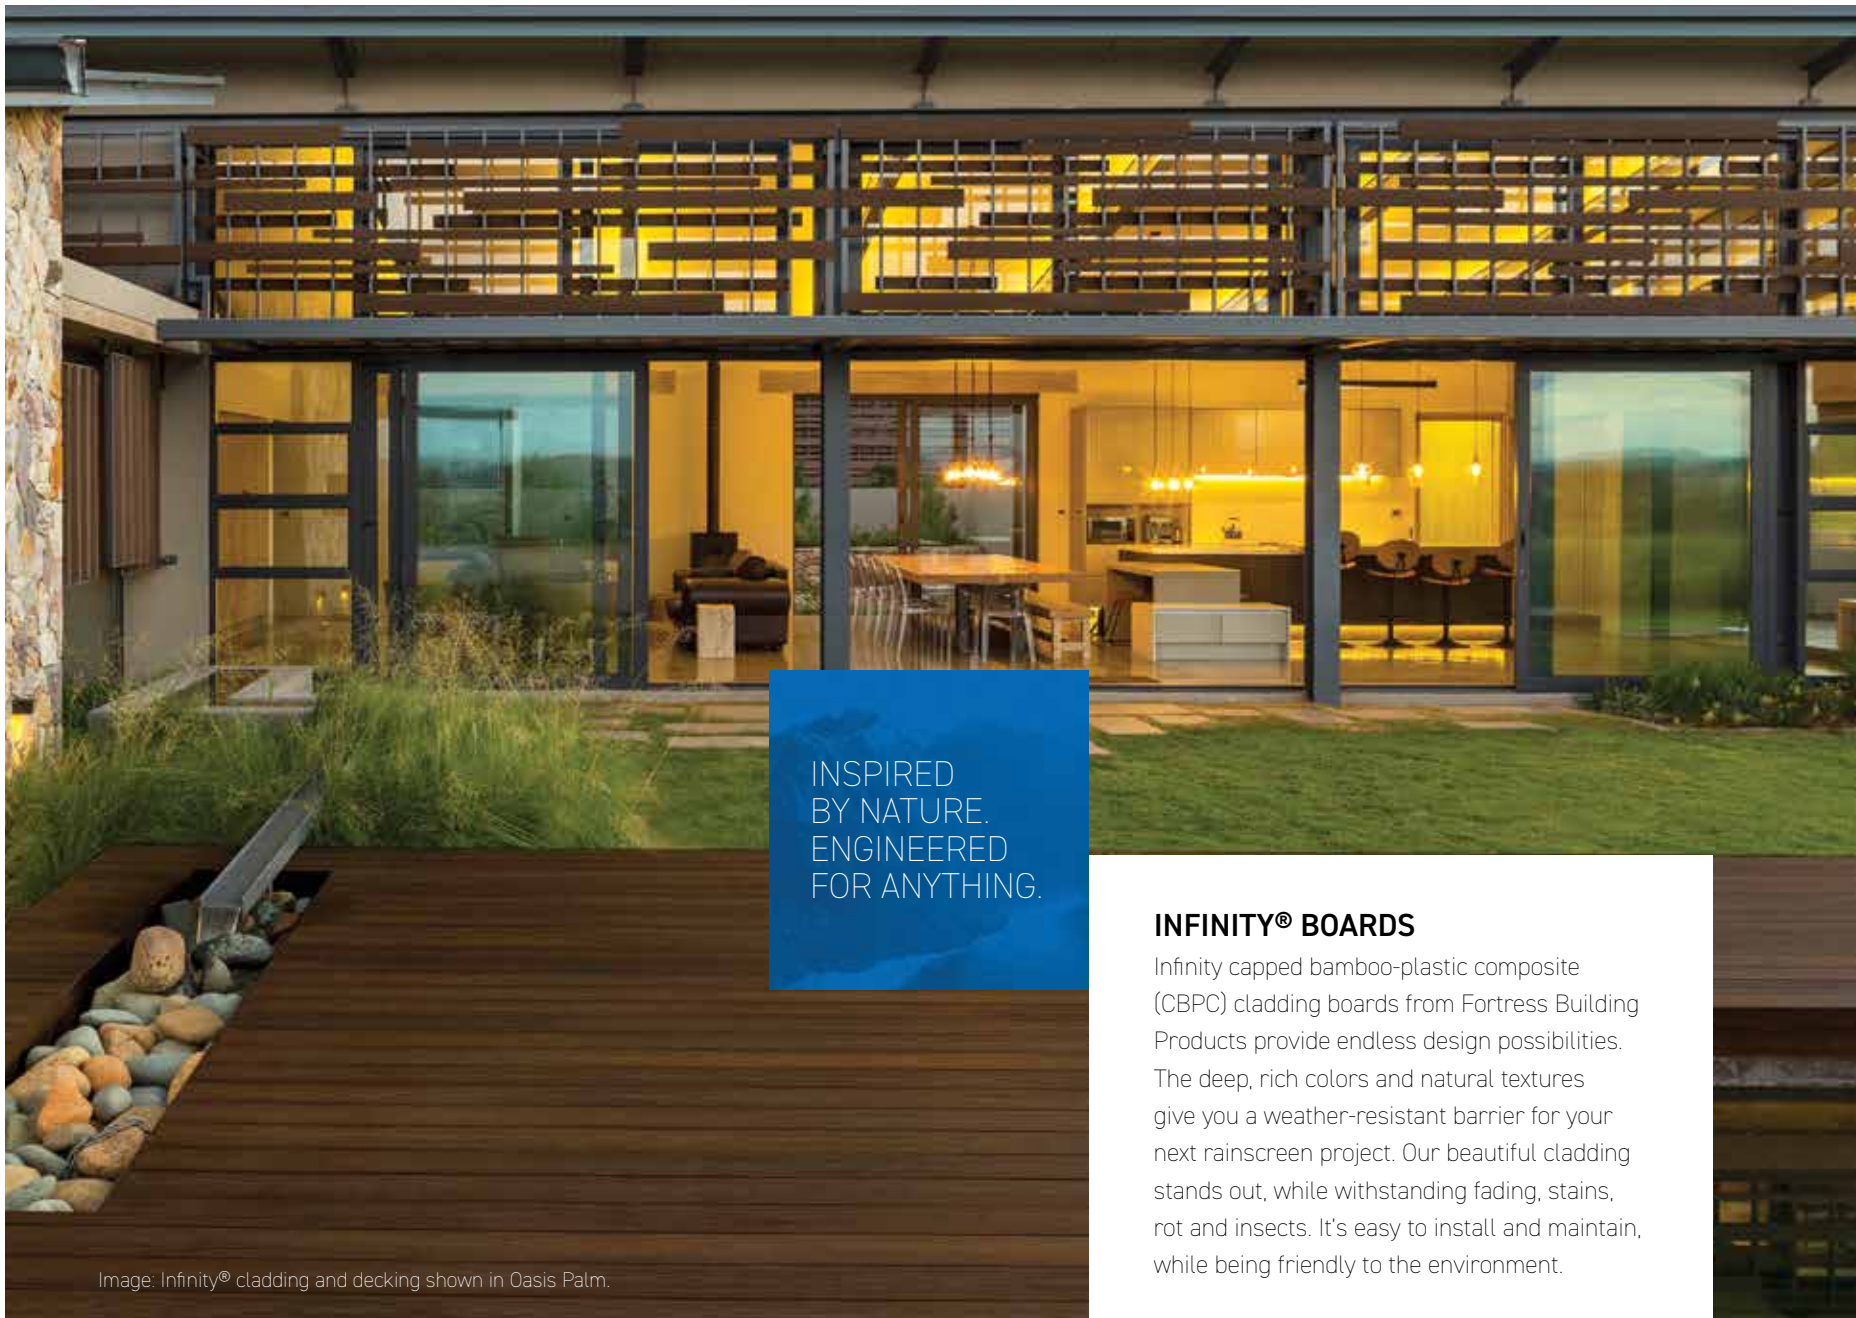

Specs: 5.5" x .945" x 20'  
(140mm x 24mm x 610cm)

Square boards can be installed with Hulk Face fasteners.

## FEEL SECURE IN OUR FASTENERS

A different kind of cladding needs a different kind of fastener. Fortress® HULK products were developed using state-of-the-art technology and manufacturing methods. They work in perfect synergy with our cladding boards, and they are extremely durable and corrosion resistant for long term applications. HULK screws use an advanced bit lock system, which maximizes torque transfer for easier installation.
