

THE WORLD NEEDS REBELS

At Fortress Building Products, we strive to be designers of change — not just in the industry, but also in the world around us. Our Infinity® co-extruded bamboo-plastic composite (CBPC) boards, and our Apex® capped bamboo PVC (CBPVC) boards both work in harmony with nature.

From the reused, recycled and renewable raw ingredients we use to create our products, to the solar power we harness to manufacture it (and the countless trees we protect from felling), we are proud to offer you smarter innovation for sustainable decking and cladding.

JOIN THE REVOLUTION.

BAMBOO: THE NATURAL CHOICE

Bamboo is strong,
safe and sustainable.

It has a greater
tensile strength
than steel, and
can withstand
compression
better than
concrete.

Bamboo is a type of grass
and grows and regenerates
extremely quickly, with most
species reaching adulthood
within 3 – 5 years.

This amazing plant is one of
the most environmentally
friendly resources on the planet
and requires no pesticides or
chemical fertilizers to grow.

Bamboo keeps our soil
stronger, our air cleaner and
our environment healthier.

REUSE PLASTIC FOR THE PLANET

Our world faces one of its
greatest threats from our short-
sighted consumption of single
use plastics. They are choking
our oceans. Once in the water,
plastic never fully biodegrades.

Fortress®
cladding products
are made of

60%

bamboo fibers
and

40%

recycled plastics,
which would
otherwise end
up in landfills.

Last year our composite
products saved the equivalent of
500 MILLION
plastic bottles.

ECO - LOGICAL

Our eco-friendly products are a great long-term investment for you and the environment:

Over the 25-year life of the product, Fortress® Infinity® & Apex® boards only require water & dish soap to keep them looking like new. **That means our decking and cladding prevents gallons of toxic preservatives, stains, sealants or other environmentally-harmful chemicals from being washed into the groundwater.**

IDEAL CLEANING

Infinity & Apex boards clean with dish soap and water

VS.

Wood needs 4 gallons of preservative every year for each 1,000 sq. ft.

PRODUCT LIFESPAN

Wood needs to be replaced every

10-20 years, doubling its carbon footprint

Fortress Infinity & Apex boards life span is greater than
25 years

OUR PLANTS USE THE SUN

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy.

In our factory nothing is wasted. This means that every bit of leftover material is put back into the manufacturing line to be recycled and made into something new and sustainable.

The process is pollution free, and no greenhouse gases are emitted.

Our products are now manufactured using 100% solar power.

Plus, not a single tree is cut down for the purpose of producing Fortress® decking and cladding boards.

UP TO THE TEST

Fortress has several globally recognized certifications and has been through years of vigorous product testing to ensure top quality performance. Product support documents include:

FSC (Forest Stewardship Council) certification for Apex & Infinity

Forest Stewardship Council™

Intertek – Verification & Testing / Code Compliance Research Report for Infinity.

INDEPENDENT INSPECTION
